Reception date: December 12
Delivery date: December 16

Heuristic Evaluation

| Nº	Problem	Heuristic	Description	Severity	Solution
1	Not indicating what activity was changed	Visibility	When changing the activity, it should highlight activity	Minor	When the activity it's changed it should be highlighted with a different border
2	Missing button shortcut for add note on statistics scenario	Efficiency of use	It's not clear that it is possible to add a note by clicking on the circular graph	Major	Add a shortcut button near the circular graph
3	Times don't appear when you update the hours of an activity	Visibility	In the first scenario when you change the hours and update the activity, after that if you click the hours don't appear.	Major	Even if the activity change the position to adjust the new time, it also needs to be reflected inside the activity.
4	The timers don't start in 00:00:00	Efficiency of use	If you try to put a new time it never starts from 0, so if for example you just want to add seconds you need to change three columns instead of one.	Minor	Not randomize the timers and put exactly to begin with 00:00:00
